Once just specks on the vast landscape of the Northern Plains, these twin cities prospered, teeming with their own dynamic culture, economy, and politics. Moorhead developed first, boosted by railroad manager Thomas Hawley Canfield, who touted it as superior to Fargo. The Roman Empire Divided May 04 2023 In 400 the mighty Roman Empire was almost as large as it had ever been; within three centuries, advances by Germanic peoples in western Europe, Slavs in eastern Europe and Arabs around the eastern and southern shores of the Mediterranean had brought about the loss of most of its territory. Ranging from Britain to Mesopotamia, this book explores the changes that resulted from these movements. It shows the different paths away from the classical past that were taken, and how the relatively unified civilization of the ancient Mediterranean gave place to the very different civilizations that cluster around the sea today. This comprehensive and authoritative second edition has been thoroughly revised and updated line-by-line, and contains several new sections dealing for instance with the new evidence provided by recent finds like the Staffordshire Treasure and the widespread effects of the plague. As well as a completely new bibliographical essay, The Roman Empire Divided now also includes six maps and an expanded selection of illustrations fully integrated in the text.

The Roman Empire Divided, 400-700 Feb 01 2023 Unmatched in its chronological sweep, and with an impressive and unusual geographical range, this ambitious history offers a new and vital interpretation of the post-Roman world. The decline and fall of the Roman Empire has transfixed historians for centuries. This important new account looks at what happened after the power of the once mighty empire was swept away. Smaller states founded by Slavs, Arabs, Germanic peoples and others moved in to fill the void and laid the foundations for the later histories of western Europe, the Balkans, the Middle East and north Africa. John Moorhead looks at how these fundamental changes were influenced by other social, economic and political developments taking place at the same time. Using a fascinating array of evidence he weaves the numerous threads into a convincing and lucid narrative and shows how, by the end of the eighth century, the civilization of the ancient world had been replaced by a series of units which had very little in common with each other.

Complete Writings May 12 2021 The extraordinary writings of Phillis Wheatley, a slave girl turned published poet In 1761, a young girl arrived in Boston on a slave ship, sold to the Wheatley family, and given the name Phillis Wheatley. Struck by Phillis' extraordinary precociousness, the Wheatleys provided her with an education that was unusual for a woman of the time and astonishing for a slave. After studying English and classical literature, geography, the Bible, and Latin, Phillis published her first poem in 1767 at the age of 14, winning much public attention and considerable fame. When Boston publishers who doubted its authenticity rejected an initial collection of her poetry, Wheatley sailed to London in 1773 and found a publisher there for Poems on Various Subjects, Religious and Moral. This volume collects both Wheatley's letters and her poetry: hymns, elegies, translations, philosophical poems, tales, and epyllions--including a poignant plea to the Earl of Dartmouth urging freedom for America and comparing the country's condition to her own. With her contemplative elegies and her use of the poetic imagination to escape an unsatisfactory world, Wheatley anticipated the Romantic Movement of the following century. The appendices to this edition include poems of Wheatley's contemporary African-American poets: Lucy Terry, Jupiter Harmon, and Francis Williams. For more than seventy years, Penguin has been the leading publisher of classic literature in the English-speaking world. Lake Erie Wine Country Feb 27 2020 In 1818, Deacon Elijah Fay planted the first grape vines of the Lake Erie Wine Country, located in the Lake Erie Concord Grape Belt. Fay's relatives planted the premier Concord vineyards in Brocton, New York, where the mighty Concord grape thrived. Vineyards were planted along the shore of Lake Erie in both New York and Pennsylvania, attracting the likes of Dr. Charles Welch, who relocated his grape juice operations to Westfield, New York, in 1897. Regional wineries sprung up during the grape boom of the 19th century but went out of business due to Prohibition in 1919. While New York permitted commercial wineries after Prohibition, it was not until 1968 when wineries were allowed to reopen in Pennsylvania. Today, the Grape Belt spans almost 60 miles along the southern shore of Lake Erie. Quaint towns dot the Grape Belt, which is now home to the Grape Discovery Center and boutique wineries that welcome thousands of visitors each year."

The Impeachment of Abraham Lincoln Nov 29 2022 From the author of the bestsellers The Emperor of Ocean Park and New England White, an electrifying and provocative historical novel set in an alternate history in which Abraham Lincoln survives assassination at Ford's Theatre on April 14, 1865. In this gripping legal and political thriller, Stephen L. Carter imagines what might have happened if Lincoln had lived to face the tumultuous post-war politics of 1865 Washington, D.C., including an impeachment trial for overstepping his Constitutional authority during the Civil War. At the novel's center is Abigail Canner, a young black woman recently graduated from Oberlin, who is hired by the D.C. law firm that is working on Lincoln's defense. When one of Lincoln's lead lawyers is found brutally murdered, Abigail is plunged into a web of intrigue, politics, and conspiracy.

Reining in the State Apr 10 2021 Presidents Lyndon Johnson and Richard Nixon dramatically expanded the federal government's domestic security apparatus to cope with social unrest that rocked their administrations. By the mid-1970s, the Justice Department and Army maintained some 400 databanks containing nearly 200 million files on supposedly subversive individuals and organizations. Katherine Scott chronicles the subsequent public response to that government action: a determined citizens' movement to rein in the state. She details the efforts of a group of unheralded heroes who battled to reinvigorate judicial,

legislative, and civic oversight of the executive branch in order to curtail and prevent future abuses by government agencies. Working closely with allies in Congress, they challenged state power, instituted open government policies, and protected individual privacy rights. Scott has assembled a cast of characters with compelling stories: Russ Wiggins of the Washington Post, who organized a citizens' campaign for government transparency; Representative John Moss, who called attention to government censorship; ACLU Director Aryeh Neier, who created a legal strategy for judicial oversight of executive branch security measures; Senator Sam Ervin, a civil libertarian who demanded greater oversight of the executive branch; and Morton Halperin, a former NSC staff member, who called attention to the gross constitutional violations of the nation's top security agencies. Rejecting the agendas and methods of both the radical left and the antigovernment right, these progressive reformers sought to bring the American state in line with democratic practice. When Army Captain Christopher Pyle blew the whistle on the U.S. Army's domestic surveillance program, reformers had evidence of illegal domestic spying that they had long suspected but could not confirm. Scott explores how his action united liberals and conservatives to end such abuses. She also assesses how Watergate prompted broad debate in the public sphere about the problems of executive power, the need for greater transparency in domestic security policy, and greater oversight of the activities of the FBI and CIA. These reformers' efforts bore fruit with the passage of a series of major legislative reforms, including the 1974 Freedom of Information Act revisions, the 1974 Privacy Act, the 1976 Government in Sunshine Act, and the 1978 Foreign Intelligence Surveillance Act. Now that government surveillance of citizens has returned to public consciousness in the wake of 9/11, Scott's stirring account reminds us that power still resides with the people.

Dakota Jun 24 2022 The lives and schemes of frontier politicians, Northern Pacific Railroad executives, bonanza farmers, and homesteaders converge in the story of Frances Houghton Bingham, who marries the son of a Red River Valley bonanza farmer in order to remain near her new husband's sister. Emotionally complex, willful and resourceful, Frances is seduced by the myths of opportunity driving the settlement of Dakota Territory, and dares to dream of a new world in which to realize her unconventional desires. Providing a counterpoint to the dramatic risks taken by Frances is the generous voice of Kirsten Knudson, the daughter of Norwegian homesteaders. As Kirsten grows from a voluble girl to a formidable woman, her observations (equal parts absurdity and insight) reveal the heart of the novel.
