This informative book teaches readers about the seven continents and how to recognize them on maps. Through supportive text, vibrant images, and a helpful glossary, index, and table of contents, readers will learn about map basics like the compass rose, a scale, and a legend. Our classic political map of Africa features country boundaries, place names, bodies of water, airports, major highways and roads, and much more. Map is printed on premium quality paper stock, laminated, rolled, and packaged in a clear plastic sleeve. Map Scale = 1:14,244,000 Sheet Size = 24" x 30.75" Learn how to draw a map of North America. Simple text takes early readers step by step through the types of features a continent map needs to have and how to find the information. Color Overheads Included! Explore the varied features of the United States while reinforcing basic map reading skills. Sixteen student pages and accompanying blackline and full-color maps coordinate to provide a relational study of the elevation, vegetation, products, population, and peoples of the United States. Student pages challenge students to combine maps and additional resources in order to answer questions and make judgments. Question topics follow the Five Themes of Geography as outlined by the National Geographic Society: finding absolute and relative locations on a map, relating physical and human characteristics to an area, understanding human relationships to the environment, tracing movement of peoples and goods throughout an area, and organizing countries and continents into regions for detailed study. 101 Reproducible outline maps of the continents, countries of the world, the 50 states, and more. This atlas traces the formation and development of the U.S. over 500 years, from the time of the early European colonies through to the densely developed and influential country it is today. It also discusses the events leading to the discovery of North America. It looks at American cartography as well. **This is the chapter slice "Map the World" from the full lesson plan "Mapping Skills with Google Earth"*** Students will learn in-depth how to read and create maps with our engaging resource designed for students in grades three to five. All of our content meets the Common Core State Standards and are written to Bloom's Taxonomy. An exploration of the ways early modern European artists have visualized continents through the female (sometimes male) body to express their perceptions of newly encountered peoples. Often stereotypical, these personifications are however more complex than what they seem. The Maps for Curious Minds series is back—with 100 vivid infographic maps that transform the way we understand the cultural and geographical wonders of North America No matter how well you think you know North America, the 100 infographic maps in this singular atlas uncover a trove of fresh wonders that make the continent seem like the center of the universe. Did you know that North America is where the first T. rex was found? Or that it's where you can visit the world's biggest goode as well as its oldest, tallest, and largest trees—not to mention the world's tallest and steepest roller coasters?! Brimming with fascinating insight (Who is the highest-paid public employee in each state?) and whimsical discovery (Where can you visit the world's largest island in a lake on an island in a lake on an island?), this book highlights the unexpected contours of geography, history, nature, politics, and culture, revealing new ways to see North America—and the hundreds of millions who call it home. **This is the chapter slice "Map Your Community" from the full lesson plan "Mapping Skills with Google Earth"*** Teach your students the basics of map reading with our engaging resource designed for students in grades prekindergarten to two. Start with the elements found on a map, such as symbols, legends and the compass rose. Then, have your students apply what they've learned by mapping their classroom and route to school. All of our content meets the Common Core State Standards and are written to Bloom's Taxonomy. The Mapping of Africa systematically categorizes and provides an overview of all printed maps showing the entire African continent published from 1508 to 1700. Volume 7 in the Utrechtse Historisch-Cartografische Studies. Supplement to the Vegetation Monographs As with all things Montessori, students begin with the concrete and move to the abstract. When learning geography, students first develop an understanding that the earth is a round globe, made up of land and water. They then manipulate the shape of each continent before addressing its name and location. Montessori: Map Work introduces readers to the seven continents via textured edges to trace with their fingers, modes of transportation between each one for spatial context, and illustrated native animals for relevant and meaningful associations. Young children will absorb the age-appropriate geography and gain a better sense of their place in the world. Praise for Montessori: Map Work "This ingeniously designed book follows the "Montessori way" of teaching children concrete concepts in an accessible way." --School Library Journal This educational book is designed to help learners better understand the importance of geography and the world in which they live. You can color your way around the world and discover the landmarks, animals, and people that make each country and continent unique. It is also a useful learning tool for elementary school students, the Maps Coloring Book will also provide preschoolers with challenging activities. Helping students to develop deep subject knowledge and high-level geographical skills with comprehensive coverage, stimulating activities and assessment support. Features: ?8.5 x 11 inches format ?Printed single side for ease of removal and no bleed through. ?High-quality ?Makes a great gift!
