web forces that provide energy and direction type of influence a power to affect persons or events especially power based on prestige etc noun one possessing or exercising power or influence or authority may the force be with you the forces of evil synonyms power web jan 10 2020 updated on january 10 2020 in science force is the push or pull on an object with mass that causes it to change velocity to accelerate force represents as a vector which means it has both magnitude and direction in equations and diagrams a force is usually denoted by the symbol  $f$  web labour force participation rate is the proportion of the working age population that is either employed or unemployed the labour force participation rate increased by 0.9 of a percentage point from 58.5 in q4 2022 to 59.4 in q1 2023 labour force participation and absorption rates q1 2013 q1 2023 6 web the force known to the kva as the power of cosmos and referred to as the breath of gelgalar by the gelgalar resident wise man of kooroo was a metaphysical spiritual binding and ubiquitous power that held enormous importance for both the jedi and sith monastic orders web the force is a mysterious energy field created by life that binds the galaxy together harnessing the power of the force gives the jedi the sith and others sensitive to this spiritual energy extraordinary abilities such as levitating objects tricking minds and seeing things before they happen while the force can grant users powerful web in physics force is defined as the push or pull on an object with mass causes it to change its velocity force is an external agent capable of changing a body's state of rest or motion it has a magnitude and a direction web what is the force required to accelerate an object with a mass of 20 kg from stationary to 3 m/s  $f = ma = 20 \text{ kg} \cdot 3 \text{ m/s}^2 = 60 \text{ n}$  newtons are a derived unit equal to 1 kg m/s<sup>2</sup> in other words a single newton is equal to the force needed to accelerate one kilogram one meter per second squared further reading web to use physical strength or effort to make something move or open if the piece won't fit in the hole don't force it he forced his way through the crowd to reach the exit to force a web the force is a metaphysical and ubiquitous power in the star wars fictional universe force sensitive characters use the force throughout the franchise web may 11 2023 last modified on wed 10 may 2023 22 23 edt the pioneering mommy blogger heather armstrong who laid bare her struggles as a mother and her battles with depression and alcoholism on her site dooce web 1 a strength or energy exerted or brought to bear cause of motion or change active power the forces of nature the motivating force in her life 2 capitalized used with a number to indicate the strength of the wind according to the beaufort scale a web dec 23 2021 the electromagnetic force is responsible for some of the most commonly experienced phenomena friction elasticity the normal force and the force holding solids together in a given shape web a force is a push or pull acting upon an object as a result of its interaction with another object there are a variety of types of forces previously in this lesson a variety of force types were placed into two broad category headings on the basis of whether the force resulted from the contact or non contact of the two interacting objects web strength energy power intensity a personality of great force verb used with object forced forc ing to compel constrain or oblige oneself or another person to do web 1 noncount physical strength power or effect the front of the car took the full force of the collision instruments used to measure the force of the wind 2 noncount power or violence used on a person or thing web m 15 w 16 5 add to bag favorite the latest and greatest innovation to hit the streets the force 58 gives you the durability of a cupsole with the flexibility of vulcanized shoes hidden details like the how to guide on the sockliner add a playful twist inspired by getting outside to top it off textile materials and throwback branding web may 15 2023 the meaning of the force is the police organization in a particular area police force how to use the force in a sentence web jul 3 2019 force is a quantitative description of an interaction that causes a change in an object's motion an object may speed up slow down or change direction in response to a force put another way force is any action that tends to maintain or alter the motion of a body or to distort it objects are pushed or pulled by forces acting on them web may 17 2023 a u s air force f 15d ended up in an irrigation canal tuesday afternoon after coming in for a landing at kingsley field in klamath falls the 173rd fighter win web the meaning of force a force is a push or pull upon an object resulting from the object's interaction with another object whenever there is an interaction between two objects there is a force upon each of the objects when the interaction ceases the two objects no longer experience the force forces only exist as a result of an interaction web written as an equation net force is equal to gravity plus wind since the net force is now pointing down and to the right that also dictates the direction that that particle will accelerate if there are more forces at work we would add web opposite of an army unit typically divided into several companies squadrons or batteries liberate noun opposite of the force per unit area exerted by a fluid against a surface with which it is in contact release mitigation relaxation alleviation web in physics a force is an influence that causes the motion of an object with mass to change its velocity e.g. moving from a state of rest i.e. to accelerate it can be a push or a pull always with magnitude and direction making it a vector quantity it is measured in the si unit of newton  $n$  and represented by the symbol  $f$  formerly  $p$  web apr 25 2023 force in mechanics any action that tends to maintain or alter the motion of a body or to distort it the concept of force is commonly explained in terms of isaac newton's three laws of motion set forth in his principia mathematica 1687 web noun 1 as in manpower a body of persons at work or available for work the entire force of the shipyard will be needed to get this government order done on time synonyms similar words manpower workforce staff personnel web may 5 2023 chart showing the share of people ages 25 to 54 who are participating in the labor force in april the rate increased to 83.3 percent showing that the labor market is still strong web the force was an energy field created by all life that bound everything in the universe together it was known by a variety of names throughout galactic history it was called the ashla by the lasats it by the dianoga omi the life current by the mustafarians the tide by the lew elans the web 571 opposites of force words and phrases with opposite meaning lists synonyms
