The author is a sociology instructor, writer, and editor who has taught a writing for sociology class for over 12 years.

Essay from the year 2004 in the subject Business economics - Accounting and Taxes, grade: Distinction (83%), The University of Sydney (Faculty of Law), course: Comparative Corporate Taxation, language: English, abstract: This essay briefly describes the main different theoretical approaches (tax systems) designed to alleviate the double burden of corporation tax and shareholder income tax under Part 2. Parts 3- 5 explain how the problem of dividend double taxation was tried to be solved in the heterogeneous tax systems of the Germany, the UK and the US. However, the essay will not cover the different double tax avoiding treaties in force in those countries. Presents a list of topics for student research projects, with symbols indicating the level of difficulty and likelihood of finding materials in the library.

Seminar paper from the year 2005 in the subject English Language and Literature Studies - Literature, grade: 1,3, University of Göttingen (Seminar für Englische Philologie), course: Nineteenth-Century Fiction, language: English, abstract: In this term paper I am going to examine and compare how societal structures and social status are depicted in the fictional autobiography Jane Eyre by

Charlotte Brontë and the social satire Emma by Jane Austen. The decision for this topic and why I limited the survey to these two novels is based on several reasons. Concerning the topic I was influenced by my first reading impressions in which I was astonished at the depicted variety and importance of societal structure which thus simply inspired me to learn more about it. In respect to the selected novels my choice was more differentiated. When I started working on this paper I wanted to include Dickens' "Great Expectations" but soon I decided that this might lead - due to the limited length of 20 pages - to a quite superficial examination of the topic. Moreover, excluding Dickens appeared rational to me due to the fact that the novels by Austen and Brontë seemed to provide, with their similar themes and their female protagonists, a greater basis for comparison. Knowing that the Brontës did not like what and how Jane Austen wrote confirmed my speculations in regard of these novels providing an interesting basis for comparison. Furthermore, the thirty years which lay in between the publications of Emma (1816) and Jane Eyre (1847) make it possible to examine in how far society had changed in the meantime. Starting off with a comparative structural analysis of the novels in the backdrop of the question how social status influences the heroine's progresses, I want to show how much social status mattered and which consequences were connected to it. In the following sections, Emma and Jane Eyre shall be examined and compared with regard to the parts of society that play a role in them, This book is a rebuttal of the common belief that grave environmental consequences are associated with the issues of global warming and nuclear hazards. Firstly, it is argued that after 25 years of research no-one has actually found evidence for greenhouse warming. Instead, the heat has caused the evaporation of ocean water to increase cloud coverage, reflecting more sunlight away, cooling down the earth and nullifying the effects of greenhouse warming. The author describes this revolution in climatology through new scientific discoveries that solve the longstanding mystery of the ice ages and explain the enigma of the missing greenhouse heat. The solution of the ice age problem is a far most important scientific accomplishment. In the second part of the book, the author argues that the effects of low-level radiation can be beneficial rather than damaging. Evidence is presented proving that low-level radiation in the US from both natural sources and human activities such as nuclear bombs tests actually reduces death rates from cancer and other diseases and increases longevity. In the Indian State of Kerala life span has been shown to increase 10.5 years due to the natural radiation from thorium mines. The book proposes that primitive life forms must have developed immune systems to counter the harmful effects of natural radioactivity and that low-level radiation from nuclear waste may one day be transformed from trash to treasure. Nature has always been kind to humans. But our self-aggrandizing species has mistaken blessings for disasters and spoiled the otherwise splendid 20th century. On the other hand, a lot of companies, even big corporations, have gone bankrupt over the last years, because of their confusing and inefficient business process organisation, which also led the management to take

wrong decisions. So how do these two statements match? Hence it has become more important for companies, especially for those which are globally organised, to focus on their business processes to either optimise or eliminate the one which adds no value. In this context it is an important approach to find out, in what way the most important methods of BPM, BPR, and Six Sigma can help organisations to face the challenges of today's turbulent marketplaces. Dewey. Bellow. Strauss. Friedman. The University of Chicago has been the home of some of the most important thinkers of the modern age. But perhaps no name has been spoken with more respect than Turabian. The dissertation secretary at Chicago for decades, Kate Turabian literally wrote the book on the successful completion and submission of the student paper. Her *Manual for Writers of Research Papers, Theses, and Dissertations*, created from her years of experience with research projects across all fields, has sold more than seven million copies since it was first published in 1937. Now, with this seventh edition, Turabian's *Manual* has undergone its most extensive revision, ensuring that it will remain the most valuable handbook for writers at every level—from first-year undergraduates, to dissertation writers apprehensively submitting final manuscripts, to senior scholars who may be old hands at research and writing but less familiar with new media citation styles. Gregory G. Colomb, Joseph M. Williams, and the late Wayne C. Booth—the gifted team behind *The Craft of Research*—and the University of Chicago Press Editorial Staff combined their wide-ranging expertise to remake this classic resource. They preserve Turabian's clear and practical advice while fully embracing the new modes of research, writing, and source citation brought about by the age of the Internet. Booth, Colomb, and Williams significantly expand the scope of previous editions by creating a guide, generous in length and tone, to the art of research and writing. Growing out of the authors' best-selling *Craft of Research*, this new section provides students with an overview of every step of the research and writing process, from formulating the right questions to reading critically to building arguments and revising drafts. This leads naturally to the second part of the *Manual for Writers*, which offers an authoritative overview of citation practices in scholarly writing, as well as detailed information on the two main citation styles ("notes-bibliography" and "author-date"). This section has been fully revised to reflect the recommendations of the fifteenth edition of *The Chicago Manual of Style* and to present an expanded array of source types and updated examples, including guidance on citing electronic sources. The final section of the book treats issues of style—the details that go into making a strong paper. Here writers will find advice on a wide range of topics, including punctuation, table formatting, and use of quotations. The appendix draws together everything writers need to know about formatting research papers, theses, and dissertations and preparing them for submission. This material has been thoroughly vetted by dissertation officials at colleges and universities across the country. This seventh edition of *Turabian's Manual for Writers of Research Papers, Theses, and Dissertations* is a classic reference revised for a new age. It is tailored to a new generation of writers using tools its original author could not have imagined—while retaining the clarity and authority that generations of scholars have come to associate with the name Turabian. This essential text provides an authoritative overview of research methodology for both students and professional researchers in management. Based on course needs and written by expert academics in the field, this core text addresses the practical concerns of students in undertaking research that is relevant to management practice. It places emphasis on the more practical concerns of management researchers, focusing on the detail of developing and applying particular sets of research skills. In addition, the book gives straightforward advice on how to:

- develop a systematic methodology
- learn to be a successful writer
- acknowledge the individual in the researcher

The text develops tangible skills and will be an invaluable guide for management researchers and students at postgraduate and MBA levels. When Kate L. Turabian first put her famous guidelines to paper, she could hardly have imagined the world in which today's students would be conducting research. Yet while the ways in which we research and compose papers may have changed, the fundamentals remain the same: writers need to have a strong research question, construct an evidence-based argument, cite their sources, and structure their work in a logical way. *A Manual for Writers of Research Papers, Theses, and*

Dissertations—also known as “Turabian”—remains one of the most popular books for writers because of its timeless focus on achieving these goals. This new edition filters decades of expertise into modern standards. While previous editions incorporated digital forms of research and writing, this edition goes even further to build information literacy, recognizing that most students will be doing their work largely or entirely online and on screens. Chapters include updated advice on finding, evaluating, and citing a wide range of digital sources and also recognize the evolving use of software for citation management, graphics, and paper format and submission. The ninth edition is fully aligned with the recently released Chicago Manual of Style, 17th edition, as well as with the latest edition of *The Craft of Research*. Teachers and users of the previous editions will recognize the familiar three-part structure. Part 1 covers every step of the research and writing process, including drafting and revising. Part 2 offers a comprehensive guide to Chicago’s two methods of source citation: notes-bibliography and author-date. Part 3 gets into matters of editorial style and the correct way to present quotations and visual material. *A Manual for Writers* also covers an issue familiar to writers of all levels: how to conquer the fear of tackling a major writing project. Through eight decades and millions of copies, *A Manual for Writers* has helped generations shape their ideas into compelling research papers. This new edition will continue to be the gold standard for college and graduate students in virtually all academic disciplines.

This paper provides new empirical evidence on tax buoyancy (tax revenues responsiveness to changes in economic activity) over the period 1990-2020 using a large panel of 185 countries. This study compares short-term and long-term buoyancy coefficients for total tax revenues and different individual taxes by reviewing and contrasting a range of estimators. Our results broadly confirm the main body of the literature on long-term buoyancy hovering around one. We find evidence of lower estimates for short-term buoyancy relative to previous literature, suggesting a limited automatic stabilization power of taxes. As a robustness exercise, in addition to changes in tax rates, we introduce novel control variables for tax exemptions and bases to disentangle discretionary from automatic tax revenue changes. The marginal changes in the results when controlling for policy actions suggest that, on average, the economic cycle does not necessarily influence tax reforms. A fun, user-friendly guide that takes the confusion out of writing essays and papers for students of all ages. Unlike other books that are so full of technical jargon that they confuse more than help, *Homework Helpers: Essays and Term Papers* uses straightforward language and simple steps to guide students through the essay-writing process. *Homework Helpers: Essays and Term Papers*:

Escape from Rejection Economists wish to compare prices, real income, and output across countries and regions for many purposes. In the past, such comparisons were made in nominal terms, or by using exchange rates across countries, ignoring differences in price levels and thus distorting the results. Great progress has been made in interspatial comparisons in the past thirty years, but descriptions and discussions of the new measures have been scattered in unpublished or inaccessible papers. International and Interarea Comparisons of Income, Output, and Prices includes discussions of developments in the United Nations International Comparison Program, the largest effort in this field, and in the ICOP program on the production side, including efforts in both to extend the comparisons to the formerly planned economies. Other papers in this volume explore new programs on interspatial comparisons within the United States. There are also theoretical papers on how interspatial comparisons should be made and several examples of uses of such comparisons. Latinos are the largest, fastest growing minority group in the United States, and the ways they have positively impacted our nation are significant and undeniable. This book examines the contributions of Latinos to U.S. history, providing hundreds of possible topics for term papers and research

projects along with primary, secondary, web, and multimedia sources of topical information. Subjects such as the Treaty of Guadalupe Hidalgo (1848); the Bracero Program (1942); the United Farm Workers of America Is Formed (1962); and The Great American Boycott ("A Day Without Immigrants") of 2006 are just a few samples of the topics included. Each historical event is described briefly, followed by direction toward specific research and writing topics for the student-historian. At least two alternative term paper suggestions complement these ideas, allowing creative, original approaches to historical inquiries. It is one thing to write a good scientific paper; it is quite another thing to get it published. Don Harris draws upon nearly a quarter of a century of experience as an author and reviewer of research papers, and ultimately as a journal editor. By his own admission, it contains all the things he wished that his mentors had told him 25 years ago, but did not. The material in the book is drawn from many years of finding all these things out for himself. This book provides a comprehensive review of the current knowledge on writing and publishing scientific research papers and the social contexts. It deals with both English and non-Anglophone science writers, and presents a global perspective and an international focus. The book collects and synthesizes research from a range of disciplines, including applied linguistics, the sociology of science, sociolinguistics, bibliometrics, composition studies, and science education. This multidisciplinary approach helps the reader gain a solid understanding of the subject. Divided into three parts, the book considers the context of scientific papers, the text itself, and the people involved. It explains how the typical sections of scientific papers are structured. Standard English scientific writing style is also compared with science papers written in other languages. The book discusses the strengths and challenges faced by people with different degrees of science writing expertise and the role of journal editors and reviewers. Unlike most textbooks that focus only on the technical points, these 50 worksheets go beyond basic term paper "mechanics" to help students overcome obstacles that cause stress and writing blocks. They offer practical strategies for students' most common problems, such as negative self-talk, trouble budgeting time, procrastination, being blocked for ideas, or getting bogged down in research. Topics present the entire research and writing processes in easy, manageable steps. Seminar paper from the year 2013 in the subject Sociology - Culture, Technology, Peoples / Nations, grade: 3,0, University of applied sciences Dortmund, course: Interkulturelle Kompetenzen, language: English, abstract: Coming across the term culture it is most certain that people tend to think immediately of the picture they have already created in mind towards the other culture. Comparing east to west while talking to other people within my family and my class I got usually the same answers: "China - isn't it the country where lots of people live like ants, drinking tea and eating almost everything, mostly rice and even your dog - with chopsticks, driving with their bicycle through the streets smiling all the time; no matter what weather they have?" Unfortunately I do not know any Chinese people but the prejudices about Germany are widely known. Germany is the country with less people than China. Germans love to grump about the weather when it is raining, they love to drink beer and eat Bavarian veal sausages. In fact the prejudices of Germany mostly deal with the Bavarian part of Germany leaving the impression within people's mind that all Germans are wearing a Dirndl all day and are distinct individuals. Having a look at the above mentioned images, illustrating people's usual thoughts of the other culture towards a certain topic it is more a generalized attitude towards a certain country or culture. Today people define the term culture very differently. If they are asked "What does the term culture mean?" we can hardly get exact answers. In fact culture can be expressed in different ways. It can be seen in the language of a country, in its history and art but also in food, music and education. These things are all visible for our eyes but what about cultural behavior and ways of thinking? How do different cultures express their emotions and how are they living together? All these factors in one are illustrating a certain view on a culture for us.
