*Clash of Extremes Nov 29 2020 Clash of Extremes takes on the reigning orthodoxy that the American Civil War was waged over high moral principles. Marc Egnal contends that economics, more than any other factor, moved the country to war in 1861. Drawing on a wealth of primary and secondary sources, Egnal shows that between 1820 and 1850, patterns of trade and production drew the North and South together and allowed sectional leaders to broker a series of compromises. After midcentury, however, all that changed as the rise of the Great Lakes economy reoriented Northern trade along east-west lines. Meanwhile, in the South, soil exhaustion, concerns about the country's westward expansion, and growing ties between the Upper South and the free states led many cotton planters to contemplate secession. The war that ensued was truly a "clash of extremes." Sweeping from the 1820s through Reconstruction and filled with colorful portraits of leading individuals, Clash of Extremes emphasizes economics while giving careful consideration to social conflicts, ideology, and the rise of the antislavery movement. The result is a bold*

*hard-hitting look from the creator of the first index fund. Over the course of his sixty-year career in the mutual fund industry, Vanguard Group founder John C. Bogle has witnessed a massive shift in the culture of the financial sector. The prudent, value-adding culture of long-term investment has been crowded out by an aggressive, value-destroying culture of short-term speculation. Mr. Bogle has not been merely an eye-witness to these changes, but one of the financial sector's most active participants. In *The Clash of the Cultures*, he urges a return to the common sense principles of long-term investing. Provocative and refreshingly candid, this book discusses Mr. Bogle's views on the changing culture in the mutual fund industry, how speculation has invaded our national retirement system, the failure of our institutional money managers to effectively participate in corporate governance, and the need for a federal standard of fiduciary duty. Mr. Bogle recounts the history of the index mutual fund, how he created it, and how exchange-traded index funds have altered its original concept of long-term investing. He also presents a first-hand history of Wellington Fund, a real-world case study on the success of investment and the failure of speculation. The book concludes with ten*

*The Clash of Civilizations and the Remaking of World Order Nov 22 2022 The classic study of post-Cold War international relations, more relevant than ever in the post-9/11 world, with a new foreword by Zbigniew Brzezinski. Since its initial publication, The Clash of Civilizations and the Remaking of World Order has become a classic work of international relations and one of the most influential books ever written about foreign affairs. An insightful and powerful analysis of the forces driving global politics, it is as indispensable to our understanding of American foreign policy today as the day it was published. As former National Security Adviser Zbigniew Brzezinski says in his new foreword to the book, it "has earned a place on the*

shelf of only about a dozen or so truly enduring works that provide the quintessential insights necessary for a broad understanding of world affairs in our time." Samuel Huntington explains how clashes between civilizations are the greatest threat to world peace but also how an international order based on civilizations is the best safeguard against war. Events since the publication of the book have proved the wisdom of that analysis. The 9/11 attacks and wars in Iraq and Afghanistan have demonstrated the threat of civilizations but have also shown how vital international cross-civilization cooperation is to restoring peace. As ideological distinctions among nations have been replaced by cultural differences, world politics has been reconfigured. Across the globe, new conflicts—and new cooperation—have replaced the old order of the Cold War era. *The Clash of Civilizations and the Remaking of World Order* explains how the population explosion in Muslim countries and the economic rise of East Asia are changing global politics. These developments challenge Western dominance, promote opposition to supposedly "universal" Western ideals, and intensify intercivilization conflict over such issues as nuclear proliferation, immigration, human rights, and democracy.
