Habakkuk is a book of discipleship, a book written to bring its reader to a deeper faith in Yahweh in the presence of His unthinkable deeds. Amidst oppressive evil at the hands of their Judahite brothers, the righteous of Judah cry out to God for salvation. His response is the invasion of fearsome Chaldea. What appears to be horrid judgment is actually his plan to save those who trust in Him. All His people are called to extraordinary faith, to believe Him even when His deeds are unbelievable. In this way, and only this way, will they be delivered from their oppressors and enjoy God's blessings; only by faith can they have life. Habakkuk is a challenging yet beautiful book that has much to teach the people of God. Its eloquent poetry and interpretive issues make it a suitable, even necessary, subject for Hebrew study. The goal of this commentary and reader is to facilitate theological, devotional, and pastoral engagement with the Hebrew text of Habakkuk alongside development in one's understanding of Hebrew. After an extensive introduction discussing the significant issues and laying the groundwork for interpreting Habakkuk, this commentary presents the Hebrew text juxtaposed with an English translation and with contextual glosses for Hebrew Words occurring less than thirty times in the Hebrew Bible. Each section has an introduction followed by the text and comments on textual, theological, and interpretative issues. With a balance of theological reflection, exegetical depth, and assistance with the Hebrew text, the Hebrew student will be equipped to wrestle with the text in its original language and develop their understanding of the language simultaneously. This is an introduction to the best available scholarship within Irish politics, featuring the most influential and significant articles which have been published on Irish politics during the past twenty years. Each article is accompanied by a new commentary by another leading scholar which addresses the impact and contribution of the article and discusses how its themes remain crucial today. The book covers all the most important topics within Irish politics including political culture and traditions, political institutions and parties and the peace process. The combination of the best original scholarship and contemporary commentaries on the core political issues makes Irish Political Studies Reader an invaluable resource

for all students and scholars of Irish politics. Drawing expertise and ideas from research, as well as teachers from across the country, Every Reader, a Close Reader serves as both an instructional guide and professional development tool for classroom teachers and instructional leaders to use when starting or strengthening close reading at the classroom level. You are about to write an article on the findings of your research, and you are rightly proud to communicate your findings to the rest of the scientific world. But have you ever thought about who will read your article and under what sort of conditions it will be read? Will your reader be sitting in comfortable chair, a cup of coffee at his or her side and relaxing music in the background? Will your reader be so interested in your subject that he or she will have the time and patience to read a difficult sentence twice? I am afraid this is wishful thinking; your reader is just as busy as you are and, however important your findings are, he or she has no time to struggle through a badly written text. It is therefore of utmost importance that your writing is clear, well-structured and accessible to the target reader. Ann Bless has been a trainer at various academic institutions in Europe for over 30 years. All through her career she has aimed at arousing scientists' awareness of how they communicate--why their writing is difficult to understand--and how to write clearly, concisely and readably. [Ed.]. ARTICLES AND DOCUMENTS ON AMERICAN FOREIGN POLICY AND THE VIET NAM CRISIS. THE MATERIAL IS ORGANIZED IN GENERAL CATEGORIES: THE CRISIS OF AMERICAN FOREIGN POLICY; THE RISE OF THE VIET NAM PROBLEM; THE SECOND INDOCHINA WAR; THE INTERESTED BYSTANDERS; PUBLIC ASSESSMENT; THE NEGOTIATING POSITIONS. This outstanding compilation of articles by Ravel (who was a brilliant critic) features reviews, interviews, and some 350 letters from Cocteau, Colette, de Falla, Richard Strauss, Stravinsky, and other major figures of the time. Episodic coming of age saga. As a comparative study which includes the analysis of both English-Canadian and Quebec novels, this book provides an overview of the novel as it has developed in this country since the Second World War. Focusing on narratological rather than thematic elements, the book represents a systematic application of the insights and analytical tools of reader-reception theory, in particular the models proposed by Wolfgang Iser and Hans Robert Jauss. Placing the emphasis on the text and its effects rather than on the historical or psycho-sociological genesis of the text, the author invokes the models and paradigms of other literatures to establish a broader cultural context permitting the significance of a literature to emerge as a carrier of meaning in and beyond the culture that produces it. Tracing a critical path from Hugh MacLennan's hierarchic romance structures and Gabrielle Roy's social realism to the metafiction of Hubert Aquin and Timothy Findley, the author reveals that the novel's narratological features themselves are often closely linked with ideological positions. The old saying goes, "To the man with a hammer, everything looks like a nail." But anyone who has done any kind of project knows a hammer often isn't enough. The more tools you have at your disposal, the more likely you'll use the right tool for the job - and get it done right. The same is true when it comes to your thinking. A major collection of writings from one of the most important twentieth century French authors, "The Blanchot Reader" includes six works of fiction ("Death Sentence, The Madness of the Day, When the Time Comes, Vicious Circles, Thomas the Obscure", and "The One Who Was Standing Apart from Me") and extended selections of critical and philosophical essays from his major book, "The Gaze of Orpheus". The American Journalism History Reader presents important primary texts—news articles and essays about journalism from all stages of the history of the American press—alongside key works of journalism history and criticism. "Since 1995, the number of Internet users has increased by 1.88 billion people. As the population increased, so did the number of websites, news portals, and the amount of information presented on the Internet. Information once commonly read in a newspaper can now be found online with videos, interactive features, and other forms of multimedia. Yet, is reading a story in static, plain text different from reading a story with videos and interactivity? This study asks whether or not a relationship exists between Internet news article presentations and a reader's recall and comprehension. Forty-two participants read online news articles presented in both multimedia and plain text formats before a test. The results are discussed and analyzed for future consideration."--Abstract. All those with an interest in higher education and higher education research will find this comprehensive collection of the past two decades' most influential readings on the topic an absolutely essential companion. Given the explosion of information and knowledge in the field of Life Sciences, adapting primary literature as materials in course work as part of active learning seems to be more effective in improving scientific literacy among science undergraduates than the pure transmission of content knowledge using traditional textbooks. In addition, students also read research articles as part of undertaking laboratory research projects useful for preparing them for graduate school. As such, a good grasp of reading and analytical skills is needed for students to understand how their research project contributes to the field that they are working in. Such skills are being taught at UK and USA universities. In Asia, this approach in teaching has not yet been as widespread, although similar ideas are beginning to be used in education. Written as a quick guide for undergraduate students and faculty members dealing with scientific research articles as part of a module or research project, this book will be useful, especially in Asia, for students and faculty members as the universities look to incorporating the use of scientific research articles in their undergraduate teaching. For Life Science students, the first time they encounter a primary literature can be rather daunting, though with proper guidance, they can overcome the initial difficulties and become confident in dealing with scientific articles. This guidebook provides a structured approach to reading a research article, guiding the reader step-by-step through each section, with tips on how to look out for key points and how to evaluate each section. Overall, by helping undergraduate students to overcome their anxieties in reading scientific literature, the book will enable the students to appreciate better the process of scientific investigations and how knowledge is derived in science. In the 1890s one phrase above all stood as shorthand for the various controversies over gender that swirled throughout the period: "the New Woman." In New Women fiction, progressive writers such as Sarah Grand, George Egerton, and Ella D'Arcy gave imaginative life to the plight of modern women—and reactionaries such as Grant Allen attempted to put women back in their place. In all the leading journals of the day these and other writers argued their cases in essays, letters, and reviews as well as in fiction. This anthology brings together for the first time a representative selection of the most important, interesting, and influential of New Woman writings. We who live at the end of the twentieth century are better informed--and more quickly informed--than any people in history. So why do we also seem more confused, divided and foolish than ever before? Some pundits criticize the news media for political bias. Other analysts worry that up-to-the-minute news reports on radio and television oversimplify complex realities. Still more critics point out that today's reporters can't possibly be experts on the wide variety of subjects they cover. Historian C. John Sommerville thinks the problem with news is more basic. Focusing his critique on the news at its best, he concludes that even at its best it is beyond repair. Sommerville argues that news began to make us dumber when we insisted on having it daily. Now millions of column inches and airtime hours must be filled with information--every day, every hour, every minute. The news, Sommerville says, becomes the driving force for much of our public culture. News schedules turn politics into a perpetual campaign. News packaging influences the timing, content and perception of government initiatives. News frenzies make a superstition out of scientific and medical research. News polls and statistics create opinion as much as they gauge it. Lost in the tidal wave of information is our ability to discern truly significant news--and our ability to recognize and participate in true community. This eye-opening book is for everyone dissatisfied with the state of the news media, but especially for those who think the news really informs them about and connects them with the real world. Read it and you may never again know the tyranny of the daily newspaper or the nightly news broadcast. A collection of previously published and revised articles and transcriptions concerning the American immigrant John Crandall (1618-1676), his children and some of his descendants. Teaching English language arts at grades K-5 is both a science and an art. Educators must teach literacy skills and content with best practices, while also keeping

focus on each student's individual needs. They are challenged to monitor students working independently while also conducting small group instruction. And they must focus on providing differentiated support with a rather complicated text. With increased attention to rigor, requirements, and personalized instruction, it can be a challenge to make sure all students are receiving instruction that is just right. *Comprehensive Literacy Basics: An Anthology* by Capstone Professional contains useful tips to support educators. Chapters focus on each part of the literacy and language arts block, including whole group, small group, writing, and differentiation. A collection of expert authors specializing in literacy and language arts instruction contributed chapters to the book. The quick tips and suggestions within will reinforce current practices while providing an invaluable go-to reference. Medical articles are one of the main vehicles of knowledge translation and evidence communication in the health sciences. Their correct structure and style alone are no longer enough to convey a clear understanding of the intended message. Readers must be able to understand the very essence of the article message. That is the purpose of this book. *Writing, Reading, and Understanding in Modern Health Sciences: Medical Articles and Other Forms of Communication* will help the authors of medical articles communicate more effectively in today's practice and health research environment. It explores the most effective practices for communicating using three main medical literature formats: through scientific articles, articles where the subject is not based on the practice of the scientific method, and business reports. Describing how to think beyond the prevailing IMRAD article format, this book focuses on the nature, content, domains of thought, and meanings of medical articles. The ideas and underlying propositions in this book are complementary to specific requirements appropriate for each type of medical journal. After reading this book you will better understand: How to write what is considered the most important type of medical article, the research-based medical article How to write an evidence-based argumentative medical article The challenges of clinical case reporting The general framework of medical and research ethics Classification of medical articles and their underlying studies from the causal standpoint Supplying you with the understanding required to write more effective medical articles, the book includes details about essay-type articles, research-based articles, thesis as introduction sections, definitions as part of the material and methods sections, modern argumentation and critical thinking underlying results and their discussion and conclusions about them.
