Mergers and acquisitions (M&As) reshape the corporate landscape helping companies expand market share and gain a strategic advantage. The ability to understand and analyze these transactions is a crucial skill. The first step in acquiring that skill is being able to gather and analyze information on M&As from public sources, such as financial statements. This textbook helps its readers better analyze M&A transactions using information provided in financial statements. Covering accounting and reporting of consolidations, goodwill, non-controlling interests, step acquisitions, spin-offs, equity carve-outs, joint ventures, leveraged buyouts, disposal of subsidiaries, special purpose entities, and taxes, it focuses on the link between underlying economic events and the information in financial statements and how this link affects the assessment of corporate performance. The first part of the book provides description of the accounting rules governing M&A transactions, while the second part includes cases of M&A transactions. Each case focuses on a different element of an M&A transaction, and it is followed by a detailed solution with a complete analysis. Unlike other books in this field, this textbook focuses exclusively on accounting and financial analysis for graduate and upper undergraduate level courses in financial analysis, corporate finance, and financial accounting. CCH Accounting for Business Combinations, Goodwill, and Other Intangible Assets offers practical guidance on accounting for business combinations, as

well as intangible assets and goodwill under both U.S. and international accounting standards. It covers a broad range of transactions, including: acquisitions of businesses by acquiring assets or stock; acquisitions of minority interests; leveraged buyouts; reverse acquisitions; rollup transactions; and transfers and exchanges between companies under common control. This comprehensive resource draws on a variety of accounting literature to amplify the text of FASB Statements No. 141, Business Combinations, and No. 142, Goodwill and Other Intangible Assets, for U.S. standards, and International Financial Reporting Standard 3, Business Combinations, and International Accounting Standard 38, Intangible Assets, for international standards, as issued by the International Accounting Standards Board. It provides professionals with a practical reference resource by selectively combining information from the official text of these statements, along with information drawn from the rules and releases of the SEC, consensuses of the FASBs Emerging Issues Task Force and the International Financial Reporting Committee, and lessons learned from leading accounting practitioners. This publication in the Deloitte Roadmap Series combines the SEC's guidance on reporting for business acquisitions - including acquisitions of real estate operations and pro forma financial information - with Deloitte's interpretations (Q&As) and examples in a comprehensive, reader-friendly format. When a registrant acquires or it is probable that it will acquire a business, the registrant may be required under SEC rules to file the acquiree's separate annual and interim preacquisition financial statements along with the related pro forma financial information. Disclosure of this information can be important to investors because an acquisition will generally affect a registrant's financial condition, results of operations, liquidity, and future prospects. While a registrant is also required to disclose the nature and financial impact of a business combination under the FASB's accounting guidance, the SEC's requirements are

significantly more detailed and can result in considerable financial reporting responsibilities regardless of whether a company acquires businesses frequently or only occasionally. Business Acquisitions, or "Combinations," are among the most important decisions that managers make regarding the future success of the firm. Combinations have the potential to radically alter the economics of the acquiring company in integrating the acquired firm into the company's business model(s). Therefore, it is inherent that practicing managers get the "economics" right when making business acquisitions as they will be communicated to users in the company's financial statements. Accounting for business combinations is one of the most complex accounting challenges that the finance and accounting functions of the company will encounter. The application of the fair value measurement standards as well as the recognition and measurement of acquired intangible assets and contingencies, both acquired and promised, require a unique blend of skills in accounting and valuation. This book is designed for managers and executives to be a comprehensive, yet accessible resource, in understanding the economics of both sides of the transaction; assets and liabilities acquired and consideration transferred. The book's primary purpose is to provide managers and executives with practical advice and counsel on "structuring" business acquisitions for the economic benefit of the acquiring firm. This is accomplished by having knowledge of the financial statement impacts that business acquisitions will have on the company's reported financial statements. Valuation for Financial Reporting: Intangible Assets, Goodwill, and Impairment Analysis provides guidance and insight in the identification and measurement of intangible assets and goodwill pursuant to the Financial Accounting Standards Board Statements of Financial Accounting Standards (SFAS) No. 141, Business Combinations and (SFAS) No. 142 Goodwill and Other Intangible Assets. The new rules are sweeping and complex.

Valuation for Financial Reporting will bring clarity to CFOs, auditors, valuation professionals, and CPAs by explaining the valuation aspects of the new financial reporting requirements, including how to identify the characteristics of goodwill and intangible assets, determine if impairment has occurred, and employ specific methods to assess the financial impact of such impairment. While numerous articles and commentaries on the subject have appeared dating back to the time the FASB began considering the issue, Valuation for Financial Reporting is the first to provide "real world" examples of the valuation techniques and methodologies required to perform a purchase price allocation under SFAS No. 141 and an impairment study under SFAS No. 142. Valuation for Financial Reporting will help lift the veil of mystery surrounding these two important pronouncements and provide a practical guide for their implementation. This book:

- * Shows the CPA and client how to apply the new SFAS 141 rules that pertain to all companies involved in an acquisition (buyer or seller) by analyzing and valuing the tangible and intangible assets acquired.
- * Teaches the CPA and client how to apply the new SFAS 142 rules that pertain to all companies that recognize and measure intangible assets and goodwill which may now be impaired
- * Presents detailed case studies and examples on how to apply and implement SFAS 141 and SFAS 142
- * Provides a "How To" on the identification and measurement of intangible assets.
- * Includes a checklist for controlling the gathering of data necessary for the analyses and another checklist guiding the work program for methodologies
- * Offers guidance and examples for financial reporting purposes. Provides a comprehensive explanation of the due diligence process. Includes sections on commercial, financial, legal and environmental due diligence. Covers why due diligence is used, how to do it, and how to apply the information gained. Contains sample checklists and case study examples. The one-stop resource for IFRS interpretation and application, updated for 2017 Wiley IFRS 2017 offers a

accounting and financial reporting asked by accountants, auditors, bankers, lawyers, financial analysts, and other preparers and users of accounting information. As valuation analysts know only too well, analysts, auditors and CFOs have been on their own in estimating remaining useful lives of intangible assets without significant benchmarks ever since the Financial Accounting Standards Board (FASB) created the uniform procedure whereby the acquiring entity in a business combination must perform a purchase price allocation (PPA) that matches the purchase price to asset values of the acquired company, including, importantly intangible assets. Benchmarking Identifiable Intangibles and Their Useful Lives in Business Combinations delivers a compilation of reported data, particularly on useful lives of intangible assets as reflected in over 360 purchase price allocations. Analysts will use the data to benchmark what intangibles are being discovered, categorized and valued in what industries, and the ratios of individual intangible asset categories to total assets. The guide is easy to use, allowing readers to view the data extracted from over 360 PPAs in three sections: Review of intangible asset categories complete with detailed descriptions of valuation approaches and checklists of factors to consider View data slices organized by intangible View intangible categories data by industry Benchmarking Identifiable Intangibles and Their Useful Lives in Business Combinations also delivers key statistical data that can be used to benchmark non-compete agreements, support statistical claims of the dominance of intangible assets and assist in identifying amortization tendencies. "Alliances, partnerships, acquisitions, mergers, and joint ventures are no longer exceptions in most businesses--they are part of the core strategy. As companies look to external partners for acquiring even strategic resources and capabilities, they need a practical road map for ensuring these relationships generate value. What combinations of resources do we need? How do we manage them over time? What profits will we earn? Will they

justify our investments? Benjamin Gomes-Casseres shares insight from decades of consulting and academic research on how companies create new value by "remixing" resources with other companies. Organized around three laws, Remix Strategy explains how companies can gain the most from their business combinations: - First Law: The value created by the combination should exceed the total that would be generated by the players acting alone. How much more value can we create together in the market, together? What lies behind this "joint value"? - Second Law: The combination must be designed and managed to realize the joint value in reality. What partners and structures fit this goal best? How do we manage those elements that are the sources of the joint value? - Third Law: Each participant must earn sufficient profits to reward its investment. How do we divide the joint value? How might these shares change over time? Other books explain how to structure deals or how to navigate complexities of organization and culture. This book provides core principles and a practical framework for creating and capturing value, no matter the path chosen"-- When comparing the laws of different jurisdictions, one often sees only the forest or the trees. This is particularly problematic in comparative company law, where students hope both to understand the overall framework of the law and grasp its practical application. This text's structure, now in its second edition, solves that dilemma. Chapters open with discursive analyses of the law in each of Germany, the UK and the US (Delaware, the ABA Model Business Corporation Act, and federal securities laws) and set out the high-level governing framework, particularly for the EU and its member states. This analysis is succinct and pointed, with numerous references to both the law and leading scholarship. The whole text is arranged to highlight comparative aspects. Diagrams are used where helpful. Chapters close with edited judicial decisions from at least two of the jurisdictions discussed, which allows fresh exploration of comparison in more detail, and pointed questions to guide class

discussion. Every time there's a merger, acquisition, or similar transaction, a giant pile of new documents descends on the accounting department with the call to Book That Deal!
