PE exam 85 challenging multiple-choice problems, similar in format and difficulty to the actual exam Two levels of difficulty: 19 morning (breadth) problems and 66 afternoon (depth) problems A hint for each problem, to help you get started on the right path Step-by-step solutions outlining how to answer problems quickly and correctly Explanations of the three "distractor" answer choices, so you can see where common errors occur and learn how to avoid them Mechanical Systems and Materials Exam Topics Covered Principles of Mechanical Systems and Materials Applications: Joints and Fasteners Applications: Materials and Process Applications: Mechanical Components Applications: Vibration/Dynamic Analysis With an average of six minutes to solve each SE exam multiple-choice problem, efficiency is vital to your success. Six-Minute Solutions for Structural Engineering (SE) Exam Morning Breadth Problems will help you quickly identify accurate solution procedures, effectively apply exam-adopted codes and standards, and increase your problem solving speed. These practice problems will familiarize you with the multiple-choice format, difficulty, and subject matter of the four-hour morning breadth exams for both lateral and vertical forces. Lateral force problems focus on wind and earthquake loads, and vertical force problems address loads due to gravity. Problems illustrate a range of structural engineering exam topics, including structural analysis of bridges and buildings, design and detailing of structures, and construction administration. All problems include hints to help you jumpstart your solutions. Comprehensive, step-by-step solutions illustrate efficient and accurate solution approaches. Solutions also describe common errors that lead to incorrect answers. The codes and standards adopted by NCEES are referenced throughout. new SE exam requirements NOTE: As the response to the coronavirus (COVID-19) continues to evolve rapidly around the world, AWS has announced that it's extending the retirement date of the current AWS Certified Solutions Architect Exam SAA-C01 until July 1, 2020. PSI and Pearson VUE have both temporarily closed many of their testing centers worldwide in response to global government regulations to battle the spread of COVID-19. As an alternative to taking your exam at a testing center, online proctoring is available, which allows you to take your certification exam in the comfort of your own home or office. Instead of taking the exam at a PSI or Pearson VUE testing center near you, they will be offering only online proctored exams for the foreseeable future. This means you will have more time to prepare for the current exam rather than study for the new Exam SAA-C02 that released on March 23, 2020. To help you prepare for the current Exam SAA-C01, our Study Guide, Practice Tests and Certification Kit are available for purchase. Study, practice, review! The AWS Certified Solutions Architect Certification Kit includes the AWS Certified Solutions Architect Study Guide and AWS Certified Solutions Architect Practice Tests book. Both books work in tandem to prepare you for exam day. The Study Guide comes with two custom practice tests, PLUS the Practice Tests book provides five additional, unique practice tests, all covering the five AWS Certified Solutions Architect Associate Exam objective domains—Designing Resilient Architectures, Defining Performant Architectures, Specifying Secure Applications and Architectures, Designing Cost-Optimized Architectures, and Defining Operationally—as well as one additional practice exam, for a total of 1,000 practice test questions. Plus, the accompanying interactive online learning environment and test bank makes it easier for you to study on the go, whenever and where you want! Assessment test and chapter tests Practice exam questions Hundreds of electronic flashcards PDF of the Glossary of Terms If you're looking to take the AWS Certified Solutions Architect Associate exam, this kit is what you need for comprehensive content and robust study tools that will help you gain an edge on exam day. Contains 100 multiple-choice practice problems for the chemical PE exam. Each problem is written to be solved in six minutes—the average amount of time examinees have on the exam. Solutions are included. This study guide helps prepare for the ETS Praxis 2 Secondary Math exams, given both on paper and computer. The test code is 5161. The content addressed includes Algebra and Number Theory, Analytic Geometry, Geometry, Trigonometry, Functions and their

Graphs, Calculus (first semester), Data Analysis and Statistics, Probability, Discrete Mathematics and Matrix / Vector Algebra. There are 95 practice questions embedded in the content to demonstrate how the content is applied in questions on the exam. As a graphing calculator is required for the exam, there are some instructions for use of the TI-84. This workbook is not a complete tutorial for the calculator. Topics covered Construction Geometric Design Traffic Analysis Traffic Safety Traffic Planning HVAC and refrigeration problems make up about 18% of the mechanical PE exam's breadth module and 100% of the depth module so getting some problem solving practice in this area is a good idea. Topics covered include principle fundamentals, equipment and materials, and applications. Contains 100 multiple-choice practice problems (20 for the morning module and 80 for the afternoon module) for the structural topic on the civil PE exam. Each problem is written to be solved in six minutes--the average amount of time examinees will have on the exam. Essential preparation for the Structural PE exam's breadth and depth problems.
