Lead Paint Safety Aug 19 2022 This guide on lead safety work practices was developed by the HUD's Office of Lead Hazard Control. If you perform routine maintenance on homes or apartments built prior to 1978, this guide will help you plan and safely carry out the work, while minimizing the disturbance of lead-based paint. Step-by-step instructions detail what you need to do to work smart and work safe. The guide is easy to understand and small enough to carry to work sites so you can easily follow the instructions inside. There are 5 sections: the basics; before you start work; doing the work; at the end of the job; and resources (glossary). Illustrated with clear and detailed drawings.

Lead Paint Safety Dec 23 2022 Every child should have a lead-safe home. That's why HUD is working to create lead-safe affordable housing through outreach and public education, a lead hazard control grant program, worker training, and the enforcement of regulations. This guide is one part of HUD's comprehensive approach to lead safety in the home. If you perform routine maintenance on homes or apartments built before 1978, this guide will help you plan and carry out your work safely. Step-by-step instructions and illustrations explain and show what you need to do to protect yourself and your clients if you are working in older housing that could contain lead paint. This Field Guide is a valuable tool that thousands of workers and contractors across the country are using as part of a national effort to eliminate childhood lead poisoning.
