Libby/Libby/Short wrote this text based on their belief that the subject of financial accounting is inherently interesting, but financial accounting textbooks are often not. They believe most financial accounting textbooks fail to demonstrate that accounting is an exciting field of study and one that is important to future careers in business. When writing this text, they considered career relevance as their guide when selecting material, and the need to engage the student as their guide to style, pedagogy, and design. Libby/Libby/Short is the only financial accounting text to successfully implement a real-world, single focus company approach in every chapter. Students and instructors have responded very favorably to the use of focus companies and the real-world financial statements. The companies chosen are engaging and the decision-making focus shows the relevance of financial accounting regardless of whether or not the student has chosen to major in accounting.*

Financial Accounting Aug 27 2022 For a traditional Introductory to Financial Accounting course where the accounting cycle is introduced early and the focus of the course blends aspects of both "user" and "preparer" approaches. Reimers Financial Accounting 1/e.How Accounting is Driving Change in Business.

Financial Accounting Jan 26 2020 The financial accounting course is taken by all business majors, usually in their sophomore year. Financial accounting reports summarize the financial health, operating results, and changes in financial status for a business as viewed over a

specific period of time. This information is used by outside parties such as stockholders, creditors, prospective investors, regulatory agencies, and the general public. The financial accounting market can be segmented into three categories: preparer (traditional), balanced, and user (innovative). Spiceland/Thomas/Herrmann falls into the balanced segment by offering a balance between the user and preparer orientation. The decision maker's perspective used throughout the book competes directly with Kimmel's pedagogical approach. Financial Accounting has been revised based on the great success of Financial Accounting 2e, Spiceland, Thomas, Herrmann. The content was developed with feedback from over 480 reviewers and focus group participants from across the country. The authors, David Spiceland, Wayne Thomas and Don Herrmann, have developed a unique text based on over 50 collective years of experience in the classroom. They've brought together best practices like highlighting Common Mistakes, offering frequent Let's Review exercises, integrating the course with a running Continuing Problem, demonstrating the relevance of the course to non-majors with a Career Corner, and communicating it all in a student-friendly Conversational Writing Style.

Using Accounting and Financial Information Feb 06 2021 Accounting often is referred to as “the language of business”; unfortunately, many business professionals lack the fluency in this unique language required to perform basic financial analysis, prepare budgetary forecasts, or compare competing capital investment alternatives. While there is no shortage of financial-related textbooks or reference manuals, most assume that readers have educational backgrounds—and/or have had years of professional experience—in accounting, financial analysis, or corporate finance. Using Accounting and Financial Information targets professionals with limited exposure to—or formal training in— accounting or related finance disciplines. These individuals often include—but certainly are not limited to— engineers, information technology specialists, retail managers, entrepreneurs, marketing directors, construction contractors, attorneys, and even bankers who are making career transitions from consumer lending positions to become commercial loan officers. The primary purpose of this book is to help managers and business owners

from diverse professional and educational backgrounds to: (1) converse more effectively with their accounting and finance colleagues; (2) understand the structure and the elements of general-purpose financial statements, (3) identify both the usefulness and the limitations of accounting information; (4) prepare basic financial forecasts; and (5) make sense of commonly used decision-making models.

Loose Leaf for Introductory Financial Accounting for Business Nov 17 2021 Learning Financial Accounting can often feel like learning a foreign language to students. Before students even grasp the underlying concepts of Accounting, they are immersed in unfamiliar terms, and before students fully realize the purpose of financial statements, they are asked to make detailed recording procedures. This early emphasis on terminology and recording can be a struggle for non-accounting majors to see the relevancy, leading to increased dropouts and higher failure rates. This creates a challenge for Financial Accounting instructors, who must balance the need to engage and retain non-majors while fully preparing Accounting majors for the next level. The authors of Introductory Financial Accounting for Business offer a solution emphasizing an analytical approach to Accounting – teaching students to think like business professionals and speak in terms of bottom-line consequences: How will a given transaction impact my overall business? How can I make better business decisions whether I'm an accountant, manager, or

entrepreneur? Business leaders are demanding that new graduates have these critical thinking skills in order to handle a rapidly changing modern business environment. Today's students will encounter new technological advances in automated data capture, data analytics, and artificial intelligence – processes that are automating traditional recording procedures. Rather than tallying transactions, students will be required to analyze and interpret data, making decisions early and often and thinking like business professionals. The Edmonds/Olds team's fresh approach and modern pedagogy helps prepare students for their business careers.
